- **Formulated 5-Pillar quantitative ATS scoring matrix (0–100)** assessing formatting, skill competencies, experience metrics, education, and keywords against dynamic Job Descriptions.
- **Engineered Graceful Degradation Architecture:** decoupled external AI APIs from an offline deterministic heuristic engine with **500+ regex taxonomies**, eliminating downtime during API quota exhaustion.

ScamShield AI — Dual-Engine Cyber Threat & Fraud Signal Platform React 19 • TypeScript • Gemini 2.5 • Tesseract.js OCR • Tailwind

Production URL: gmraj11132-tech.github.io/scamshield-ai | Repository: github.com/gmraj11132-tech/scamshield-ai

- **Developed production cybersecurity platform** detecting social engineering attacks across SMS, spoofed emails, malicious typosquatting URLs, and fraudulent payment screenshots.
- **Engineered client-side privacy vault with in-browser Tesseract.js OCR**, extracting forensic text metadata entirely on client machines with **zero cloud data leakage**.
- **Combined Gemini 2.5 neural reasoning with deterministic heuristic rules** to produce verbatim risk annotations, fraud probability scores, and incident remediation steps.

Customer Churn & Lifetime Value Prediction Engine

Python • Pandas • Scikit-Learn • XGBoost • Streamlit

- **Engineered an end-to-end predictive classification pipeline** analyzing subscriber behavioral transactions, achieving an **89% ROC-AUC score** via hyperparameter-tuned XGBoost and SMOTE.
- **Integrated SHAP (SHapley Additive exPlanations)** values to identify core attrition drivers and visualized feature significance through interactive dashboards.

AryanOS — Modern Glassmorphism Portfolio & Simulated Window Manager HTML5 • CSS3 Grid/Flexbox • Vanilla JavaScript (ES6+)

- **Engineered macOS desktop simulation** featuring interactive Safari browser modal, hardware-accelerated CSS ambient mesh, and asynchronous AJAX contact pipeline with honeypot security.
